About Company

V.V ENTERPRISES Industries, led by an experienced team, provides comprehensive packaging solutions with a focus on product safety and regulatory compliance. They specialize in various inks, coatings, and adhesives. Their R&D team innovates continuously, and they aim to be a leading specialty chemicals trader. They ensure quality and timely delivery through efficient logistics.

Vision & Mission

Company Vision

To Focus On As Many Customers With A Highly Range Of Aforementioned Industrial Products. We Are Dedicated In Providing Bulk Requirements Of Our Client In Various Sectors Such As Cement Industries, Powerplant.

Company Mission

We Are Elated To Let Our Customers Know That Their Satisfaction Matters The Most To The Organization. From Selection Of Raw Material To Final Production, We Remain Consistent In Keeping A Strict Check Over Our Quality.

Tile Adhesive & Jointing Mortar

THIXOFLEX-PU is a two-component polyurethane adhesive for permanent bonding of various tiles, stones, and substrates, providing superior elasticity and strength for interior and exterior applications.

RITEBOND PU is a two-component polyurethane adhesive for permanent bonding of various tiles, stones, and substrates, ensuring superior elasticity and strength for interior and exterior applications.

RITEPOXY SBA is a two-component, rapid-setting epoxy adhesive for spot bonding tiles and stones on vertical surfaces, maintaining non-sag consistency at high temperatures.

RITEBUILD FLEXGEL is a single-component, flexible, cementitious adhesive for internal and external floors and walls, ideal for vertical stone cladding and enhancing aesthetics of light-colored stones.

Tile Adhesive & Jointing Mortar

RITEBUILD STA is a cementitious, single-component, flexible adhesive for internal and external floors, walls, and vertical stone cladding, enhancing light-colored stones' aesthetics.

RITEBUILD UTA is a cementitious, polymer-modified adhesive for internal and external tile and stone fixing, offering excellent adhesion on various substrates, suitable for all tile sizes.

RITEBUILD GTA is a cementitious, high-polymer tile adhesive for internal and external use, ideal for glass mosaic tiles and swimming pools, with excellent adhesion on various substrates.

RITEBUILD FTA is a polymer-modified, cementitious adhesive for Tile-On-Tile applications, offering excellent adhesion on concrete and plaster for high-porosity tiles on interior floors and walls.

Tile Adhesive & Jointing Mortar

OUR PRODUCTS

RITEBUILD ETA is an economical, polymer-based cementitious adhesive for ceramic tiles, offering good adhesion on concrete and plastered surfaces for various applications.

RITEBUILD CTA is a cementitious, polymer-based adhesive for versatile tile applications, offering excellent adhesion on concrete and plaster surfaces, ideal for ceramic tile installations.

RITEBUILD BJM is a pre-mixed, high-bond, polymer-enhanced mortar for laying bricks or blocks, offering superior bonding and air entrainment with easy application.

RITEPOXY 212 is a two-component gel-based epoxy grout for ceramic and vitrified tiles, ideal for hygienic environments, easy to mix, apply, and maintain.

OUR PRODUCTS

RITEPOXY® ESG 1200 is a three-component epoxy grout for ceramic and vitrified tiles, ideal for hygienic environments, chemical-resistant, easy to apply, and available in 28+ shades.

RITEPOXY GLITTER STAR is a three-component epoxy grout for floors and walls, offering a sparkling, metallic finish in over 28 shades, ideal for high-visibility areas and glass mosaics.

RITEPOXY EIG 2200 is a three-component, 100% solid epoxy grout for industrial and commercial use, offering high strength, chemical resistance, and available in four shades.

RITEPOXY® TR is a two-component, translucent epoxy grout for ceramic and vitrified tiles, ideal for high-hygiene areas, offering chemical resistance and a semi-transparent finish.

OUR PRODUCTS

MYMIX CGU is a polymer-modified, white cement-based grout for ceramic and vitrified tiles, resistant to shrinkage and cracking, available in 28+ colors for various joint widths.

MYMIX GROUT ADMIXTURE 990 is a liquid polymer for enhancing cement grout quality, improving flexibility and durability, ideal for interior and exterior tile applications with CGU Grout.

MULTIPLE CLEANER is an eco-friendly, acid-based cleaner for removing stubborn stains, grime, dirt, and grease from various surfaces, enhancing cleanliness and appearance effectively.

AQUA BARRIER RWP 1400 is a polymer-based rubberized emulsion forming a flexible, waterproof membrane on various surfaces, resistant to microorganisms, for interior and exterior use.

OUR PRODUCTS

AQUA BARRIER HYBRID PU FLX 395 is a VOC-compliant, one-component polyurethane waterproofing membrane for exterior walls and horizontal surfaces, offering flexibility, high film strength, and abrasion resistance.

AQUAFLEX AWP 700 is a UV-stable, elastomeric acrylic-based waterproofing membrane that forms a flexible, durable bond, expanding with substrate movement and resisting microorganism growth.

AQUAFLEX AWP 350 is a UV-resistant, thixotropic, elastomeric waterproofing membrane for horizontal surfaces, forming a flexible, durable coat that adapts to substrate movement and climate changes.

AQUAFLEX PRIME is an eco-friendly acrylic emulsion primer for exterior and interior walls, enhancing efflorescence resistance and opacity before applying specialized waterproofing coatings.

OUR PRODUCTS

Waterproof Coating

AQUAFLEX ROOF PROTEK is an acrylic-based, fiber-reinforced waterproof coating for terraces and roofs, offering a durable, seamless, UV-resistant finish against weathering and mildew.

AQUAFLEX WALL PROTEK PRO is a high-performance acrylic coating for vertical surfaces, forming a tough, waterproof barrier that withstands harsh weather and provides long-lasting protection.

AQUAFLEX WALL PROTEK is a high-performance, single-component acrylic coating for vertical surfaces, forming a durable, waterproof barrier that withstands harsh weather and offers long-lasting protection.

INTERGRAL WATERPROOFING COMPOUND is an advanced additive for concrete, enhancing waterproofing properties and durability by integrating directly into mixtures, providing superior protection against water penetration.

OUR PRODUCTS

RITSEAL is a single-component, polymer-modified, flexible cementitious waterproof coating for cementitious surfaces, providing water resistance under hydrostatic pressure up to 2 bar.

RITECRETE 2K is a two-component, polymer-modified, cementitious waterproofing membrane forming a tough, flexible, seamless barrier with excellent bonding and crack-bridging on masonry substrates.

RITECRETE 2K FLEX PLUS is a two-component, polymer-modified, flexible cementitious waterproofing membrane with fibers and additives, designed to prevent water infiltration in concrete and cementitious structures.

RITECRETE 440 is a high-performance acrylic polymer coating for repairs and waterproofing, used as a bonding agent, mortar enhancer, waterproofing agent, and primer for internal and external applications.

OUR PRODUCTS

RITECRETE 300 is a flexible, tough, acrylic-based latex for coating, bonding, and repairs, offering water resistance and mild chemical resistance, available as a white liquid.

SUPER LATEX 770 is a high-quality additive for mixing with premium adhesives and cement, enhancing bonding strength and flexibility with various substrates when combined with RITEBUILD UTA.

SBR 330 is a liquid, high-quality styrene-butadiene rubber latex for bonding, enhancing repair mortar, waterproofing, and priming in cementitious applications, suitable for internal and external use.

SBR LATEX is a liquid, styrene-butadiene rubber latex for bonding, enhancing repair mortar, and priming in cementitious applications, ideal for internal use and mixing with cement.

OUR PRODUCTS

SEALER-210 is a water-based liquid that seals concrete porosity, offering water repellent properties, moisture resistance, reduced staining, and efflorescence effects while allowing vapor escape.

RITEFLOR Screed is a polymer-modified, cementitious dry mortar for screeds and leveling beds, mixed with water and aggregates, offering excellent bonding and self-curing properties.

SLU is a dry powder blend of cement, aggregates, and polymers, mixed with water to create a smooth, self-leveling coat, with optional sand for trowel application.

NMF is a ready-to-use, dry shake, non-metallic floor hardener that creates smooth, dense, abrasion-resistant surfaces with anti-skid properties, suitable for new and existing floors.

OUR PRODUCTS

IG 2 is a premixed, non-shrink, high-strength cementitious grout that expands in both plastic and hardened states, offering low porosity, durability, and resistance to loads.

Repair Mortar HS is a high-strength, fiber-reinforced structural repair mortar with excellent bonding, shrinkage resistance, and low permeability, suitable for trowel and wet spray applications on overhead and vertical surfaces.

MCR is a high-strength, non-shrink, pourable cementitious microconcrete for repairing horizontal surfaces, ideal for structural strengthening like encasement and jacketing, recommended for 20-100 mm thickness.

RITECARE ACF is a high-quality acrylic-based crack filler for repairing concrete and plaster surfaces, offering excellent adhesion, bonding, flexibility, and durability, ensuring long-lasting protection against water infiltration.

Building Repairs and Stone Sealer

OUR PRODUCTS

CCF is a single-component, non-shrink cementitious crack filler for concrete, masonry, and plaster, easy to apply, quick-setting, and can be smoothed and overcoated with paints.

WCC is a single-component, polymer-modified white cement grout for filling floor and wall tile gaps up to 5 mm, offering fast setting, low shrinkage, and water resistance.

RITECRETE 300 is an economical, acrylic-based, polymer-modified latex for coating, bonding, and repair. It is tough, flexible, water-resistant, non-corrosive, and resists mild chemical attacks.

Stone Sealer

SCWR-50 is a ready-to-use water repellent with advanced technology based on silicate concentrate. It renders hydrophobicity and strength to the mineral substrate.

OUR PRODUCTS

Stone Sealer

SCWR-100 is a ready-to-use water repellent with advanced technology based on silane and siloxane emulsion. It is used for porous stones as well as concrete.

Wet Look Sealer is a ready-to-use, two-in-one water and stain repellent that enhances the appearance of mineral substrates, providing a wet look while maintaining breathability.

Dry Concrete Remover is a ready-to-use cleaner for tough concrete stains on siliceous stones, dissolving calcium components for easy removal. Not suitable for calcareous stones.

MSC Algae N Moss Remover is a biodegradable, non-acidic cleaner for removing algae, moss, and microorganisms from surfaces like stone, masonry, and concrete, preventing regrowth.

Stone Cleaner and Waterproofing Chemical

FIVE IN ONE CLEANER is a ready-to-use, foaming cleaner that removes tough stains like grease, oil, paint, and ink from natural stones, concrete, and metal surfaces.

WATER SALT EATER is a durable coating for marine environments, protecting surfaces from saltwater corrosion and degradation, and extending their lifespan under harsh maritime conditions.

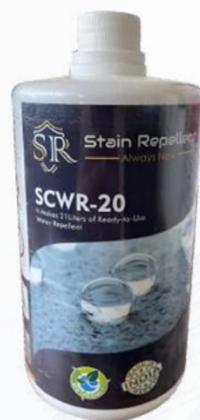

Rust O Clean is a ready-to-use solution that removes rust stains from natural stones, concrete, and masonry by solubilizing rust salts with its advanced formulation.

Waterproofing Chemical

SR-Polymer is a water-dilutable, acrylic-based waterproofing agent providing excellent protection for roofs, bathroom floors, and walls against water penetration.

Waterproofing Chemical and Wall Putty

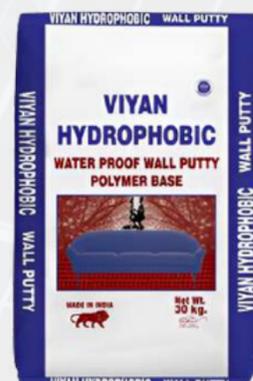

SCWR-20 uses advanced technology to react with atmospheric CO₂, forming a protective layer inside mineral substrates, enhancing hydrophobic properties and improving both lifespan and appearance.

SCWR-20 R this eco-friendly, ready-to-use water repellent sealer provides excellent protection against dampness for walls, terraces, and cement-based surfaces, starting to work within 3-4 hours.

AQUAFLEX SURE COAT is the single component, specially designed transparent coating for terrace waterproofing. Ultraviolet resistant and easy to apply product.

Wall Putty

VIYAN WATER PROOF PUTTY offers exceptional water resistance, a smooth, flawless finish, and enhanced durability, ensuring long-lasting, clean, and attractive wall surfaces in high-humidity areas.

OUR PRODUCTS

Paints

SUPERIOR RED OXIDE PRIMER enhances coverage, reduces painting costs, and provides a smooth, consistent finish for both interior and exterior surfaces, with UV resistance and eco-friendly properties.

V.V Enterprises CONTENT DISTEMPER offers superior coverage and a smooth, matte finish for both interior and exterior walls. It's easy to apply, durable, and affordable.

DECORATIVE WHITE CEMENT

UJALA PLUS offers superior whiteness, eco-friendliness, and excellent coverage for both interior and exterior surfaces, reducing paint costs, and providing UV protection and fungal resistance.

KP PLUS BASE COAT offers rich whiteness, superior coverage, and eco-friendly protection. Ideal for both interior and exterior use, it enhances final paint finish.
